Automotive Decoupling Joints - Flexible Hoses

News Bulletin NB0052

American BOA Designs and Supplies 156" Diameter Expansion Joint to Steel Processor

This large diameter expansion joint was delivered to J&L Specialty Steel in Midland, PA. The bellows were (3 ply x 0.012" wall) 321 stainless steel design in order to provide extreme flexibility for large movements in a high temperature flue gas duct system. We commend our fabrication staff for the quick assembly and shipment of this large expansion joint.
